

Company profile

Plastic Logic Germany is the leader in the development and manufacture of flexible, plastic electronics based and glass-free electrophoretic displays (EPD). The company is world renowned for its leadership in the field of flexible electronics manufacturing and runs a full-scale, automated factory in Dresden, Germany, including an open pilot line.

Using a fully industrialized process, Plastic Logic Germany manufactures the most flexible active-matrix EPDs on the market. Displays are available in a wide range of sizes, including custom designs, in both low and high volumes. Plastic Logic Germany EPDs offer huge advantages over conventional EPD being extremely robust and truly flexible. They are shatterproof; conformable; daylight-readable; ultra-thin; lightweight; very low-power and proven in the market.

These glass-free, flexible displays are being integrated by customers in a wide range of end applications including smart cards, mobile devices (smartphones and eReaders), digital signage and wearables (smart jewelry and sports accessories amongst others).
